We are a European pharmaceutical company founded in 1972. We are specialized in the development and manufacture of APIs and FDFs for the global generics industry and Chlorhexidine. We guarantee the highest standards, operational excellence and respect for the environment. With more than 50 years of history, we are focused on building strong relationships to continue being your business partner.

Our continuous innovation and R&D investment guarantees a product adapted to the particularities of each country that meets all regulatory requirements. We put our customers at the center of all our efforts, helping them to expand their product range with unique solutions.

Innovation drives us

We invest 10% of the turnover in R&D and we have more than 20 projects in pipeline.
